January - June 2021

Industrial Automation Training Courses

Werner Electric Supply is proud to offer an array of technical services and valuable training programs to help you stay current on technology, professional development, and business practices.

For up-to-date course availability, detailed descriptions, and registration, please visit WernerElectric.com/Training-Events

Instructor-Led Training

Our training courses are taught by certified Werner Electric Supply instructors — experienced teachers and experts in their fields. Our courses are tailored in scope and content to meet the needs of our attendees. Many courses are approved for CEU credit in Wisconsin.

Curriculum

We have transitioned our training courses to a new pattern: Introduction, Foundations, and Advanced for Logix 5000, Visualization, EtherNet/IP, and Kinetix.

- **Introduction:** Quick 1/2 day for beginners or as a refresher
- **Foundations:** Covers the most important concepts for a solid knowledge base – including all material in the Introduction course
- **Advanced:** Provides details on in-depth programming, designing, and advanced troubleshooting

Custom Training

Werner Electric Supply can create custom training to fit your needs either on-site or at any of our training facilities. Whether you need an introduction to new hardware, a refresher, or a combination of training topics which fit your employee needs, we will work with your team to develop a curriculum to suit your specific requirements.

Contact Information

Questions about these courses, need more information, or interested in setting up a custom training at your location?
