

# ROOF & GUTTER DEICING

Residential/Commercial Roof & Gutter Deicing Systems

Don't wait for winter, place your order before cold weather hits. The products you need are in stock along with cut-to-order capabilities.

**SR Trace<sup>®</sup> Roof and Gutter Deicing Cable** — a self-regulating heating cable that automatically varies its heat output based on changes in surrounding temperatures. The SR Trace can be overlapped to minimize damaging temperature-sensitive roof coating. The deicing cable is available with a power density of 5 watts per foot dry.

Werner Part No.	Mfg. Part No.	Description
28518	SR51J	5w/ft dry, 8w/ft wet; 120V; cut-to-order*; UL, CSA
