

Network Solutions

INDUSTRIAL NETWORK ASSESSMENTS

A first step in managing organic network growth

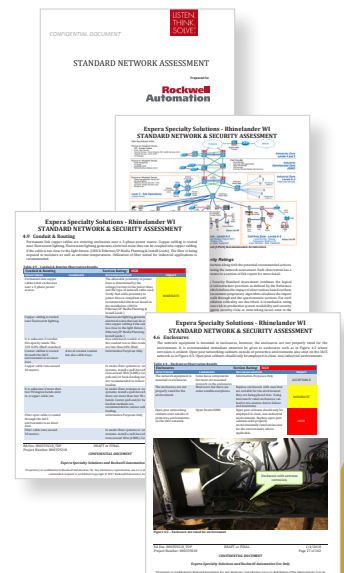

The experts at Werner Electric Supply will provide an in-depth examination of your industrial networks:

- Intelligent Ethernet devices
- Cable management
- Grounding & bonding
- Routing & labeling
- Switch selection
- Physical & logical topography
- Security

We will provide a Report Summary including:

- Overall network status
- Technical description of potential network issues/vulnerabilities
- Potential network impact and mitigation steps
- Best practices for adding new devices
