

MCC ASSESSMENT

What's behind the door of your MCC?

INSIDE:

- Assessment Details
- Upgrade with I.R.I.S.
- Related Services

An MCC Assessment provides a comprehensive record of facility equipment.

With the Internet of Things (IoT) growing faster than ever, industrial equipment needs to be connected in a more robust and smarter way. An MCC Assessment will assist in prioritization of financial investments. A Werner Electric Supply MCC Product Specialist will perform the Assessment, documenting the condition of your existing equipment and essential information regarding each individual MCC line up including location, nameplate, unit type, serial numbers and more.

DELIVERABLES

- Assessment Summary
- Existing MCC Layout Report
- Inventory of Unit (bucket) Components
- Original RA Drawings*
- Updated Schematics of Equipment**
- Spare Parts Report
- Product Life Cycle Analysis

Available in electronic and hard copy format!

*Original RA Drawings to be provided if available.

**Updating existing RA Drawings will require additional onsite time and engineering fees.

UPGRADING WITH I.R.I.S

Our Intelligent Retrofit Installation System (I.R.I.S.) allows you to connect your MCC to automation and process control systems via an installed Converged Plantwide Ethernet (CPwE) network. The CPwE architecture provides standard network services for the applications, devices, and equipment in modern Industrial Automation Control Systems (IACS) and integrates them into the wider enterprise network. An I.R.I.S. upgrade with Werner Electric Supply can make your outdated MCC as capable as a brand new MCC.

- Saves companies approximately half the cost of replacing an entire MCC
- Reduces unscheduled downtime with the use of intelligent devices to monitor warning signs, allowing facilities time to prepare components for replacement prior to failure
- Allows remote monitoring of critical assets via cellphone, tablet, or laptop
- Creates flexibility in upgrading legacy MCCs one bucket at a time, as your budget allows
- Provides manufacturing facilities the ability to upgrade equipment without having to shutdown entire portions of the plant floor for equipment upgrades

RELATED SERVICES

Emergency MCC Inventory

Moving an MCC? Lost a Splice Kit? Machine Down?

Take advantage of Werner Electric Supply's Emergency MCC Inventory to get you up and running quickly!

Project Coordination

Werner Electric Supply offers complete coordination of your MCC projects. Our team of project coordinators carefully track the progress of your project, and we work diligently to keep you informed of any problems or delays.

Let the professionals at Werner Electric Supply manage your MCC project today!
